GETH

Global Energy Trade Hub

IDEA STAGE · PRE-SEED · DUBAI, UAE

Financial Model & Unit Economics

Fee structure, per-deal unit economics, and illustrative volume scenarios for GETH's OTC commodity trade infrastructure. All figures are founder estimates for discussion — idea-stage, pre-revenue, not audited, and subject to regulatory approval.

1.10%	$5K–$750K	$800K	5–10
Standard All-In Fee	Fee Floor & Cap per Deal	Pre-Seed Round Size	First Test Deals (Target)

gethfounder@gmail.com

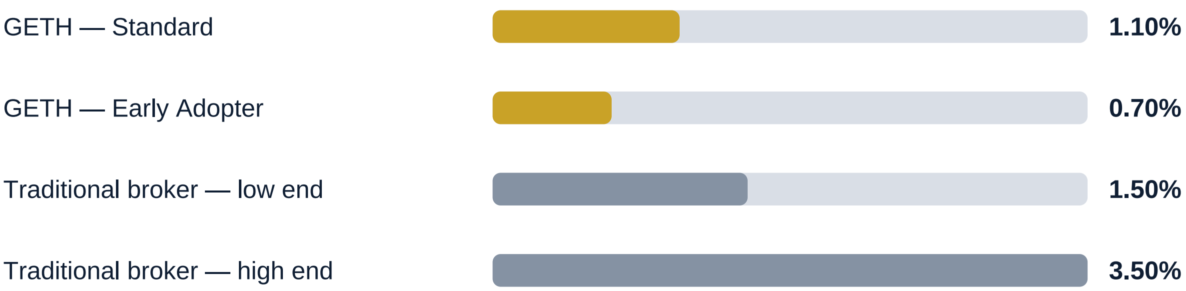
Revenue Model

GETH earns an all-inclusive transaction fee on each settled deal, charged as a percentage of deal value. The fee bundles platform services (AI matching, counterparty scoring, NFT certificates, KYB/KYC) and escrow coordination. No subscription or listing fees are planned at this stage.

	Early Adopter (First 10 Clients)	Standard (All-Inclusive)	After Intro Period (Early Adopter Lifetime)
Platform fee	0.25%	0.50%	0.35%
Escrow fee	0.45%	0.60%	0.55%
Total fee	**0.70%**	**1.10%**	**0.90%**

Comparable traditional commodity brokers typically charge 1.5%–3.5% all-in. Minimum fee: $5,000 per deal. Maximum fee: $750,000 per deal. Final pricing is subject to regulatory approval and market conditions.

GETH Fee vs. Traditional Brokers



Unit Economics — Per-Deal Fee Mechanics

The 1.10% standard fee applies between a $5,000 floor and a $750,000 cap. Three illustrative deal sizes show how the floor and cap interact with the headline rate.

Scenario	Deal Value	1.10% of Value	Fee Charged	Note
Small deal	$300,000	$3,300	$5,000	Floor applies
Reference deal (50,000 MT fuel oil, UAE→India)	$19,000,000	$209,000	$209,000	No floor/cap
Large deal	$100,000,000	$1,100,000	$750,000	Cap applies

Reference Deal — Full Settlement Waterfall

Fuel Oil, 50,000 MT · Mina-Said (UAE) → Mumbai (India) · 45-day timeline.

Deal value	$19,000,000
GETH platform fee (1.10% all-in)	$209,000
Intermediary commission (if a broker originated the deal)	$38,000
Net proceeds to seller	**$18,753,000**

If buyer and seller are matched directly through GETH's AI (no intermediary), the $38,000 commission is not paid, and the seller nets $18,791,000. Settlement is designed to complete in hours via smart contract and bank webhook, versus 3–6 weeks in a traditional wire-and-reconciliation process.

Illustrative Revenue Scenarios

GETH is pre-revenue and idea-stage. The scenarios below are founder assumptions for discussion, not a forecast or guarantee — provided to illustrate how revenue scales with deal volume once the platform is live and past the initial 5–10 pilot deals.

Scenario	Active Deals / Month	Avg. Deal Value	Effective Fee	Monthly GETH Revenue
Conservative	2	$8,000,000	0.90%	$144,000
Base case	5	$12,000,000	1.00%	$600,000
Upside	10	$15,000,000	1.10%	$1,650,000

These volumes are meaningfully above the Q4 pilot target of 5–10 total test deals; they describe a post-PMF run-rate (Phase 2, "50+ active traders"), not Year 1. Reaching them depends on completed VARA/DMCC licensing, bank escrow integration, and successful pilot validation.

Use of $800K Pre-Seed Round

Category	% of Round	Amount
Legal framework (UAE licensing + token structuring)	40%	$320,000
Team (founders + engineers)	30%	$240,000
MVP development (post-licensing)	20%	$160,000
Partnerships + test deals	5%	$40,000
IoT integration research	5%	$40,000

Round range: $600K–$1.2M. Sized to fund the legal-first phase (DMCC/VARA licensing), core team assembly, and MVP build through the Q4 beta and first test deals, ahead of a seed round. Dollar splits above are illustrative at the $800K target and scale proportionally across the $600K–$1.2M range.
