

GETH — Global Energy Trade Hub

Idea Stage • Pre-seed • Dubai, UAE (VARA/DMCC pathway)

Website: <https://gethfunder.github.io/geth-website/>

Ask: \$600k – \$1.2M pre-seed

Problem

- \$4.6T OTC commodity market → 63% manual processes (Excel, email, fax)
- Fake certificates cost buyers >\$50B/year
- Disputes over cargo quality take 18+ months in courts
- SMEs have no access to trade finance or verified counterparties
- Existing platforms (Vakt, Komgo) failed — closed consortiums, real cost 1.5-3.0%

Vision — Digital Platform for OTC Commodity Trade

GETH aims to become a next-generation automated digital ecosystem combining three layers:

1. AI Smart Layer

- Counterparty risk scoring (financials, legal records, reputation → trust index)
- Commodity matching (finds best offers matching buyer specs)
- Deal stitching (automatically pairs buy/sell orders)
- Automated KYB/KYC via API — <10 min verification

2. Trust & Tracking Layer

- IoT-based cargo monitoring (temperature, GPS, tamper-proof)
- NFT certificates linked to SGS/Bureau Veritas
- Smart contract escrow via regulated bank (RAKBANK/Emirates NBD)
- Automated arbitration based on DIFC-LCIA rules → 14-day target

3. Two-Token Economy

- \$GETH (exchange token, 100M max supply) — buyback & burn from platform fees
- \$vGETH (utility/governance token) — burned for certificates, API access, DAO voting

Phase 2: Syndicated Deal Investment (SDI)

Post-PMF, GETH will introduce SDI — allowing crypto investors to participate in real commodity deals and earn yield from profit share:

- AI automatically matches sellers/buyers, then offers deals to third-party investors
- Three investment tiers: Explorer (\$1k, 8-12% APY), Trader (\$10k, 15-25% APY), Whale (\$100k+, 25-40% APY)
- 45-day lock-up per deal, fully automated via smart contracts on Ethereum L2 (Arbitrum)
- Revenue streams: 20% performance fee, 1-2% AUM management fee, 5% early exit fee
- Year 3 revenue uplift: +\$6-9M (total \$20-23M vs \$13.5M without SDI)
- Regulatory: Structured under ADGM FSRA framework, accredited investors only initially
- Insurance wrapper through Lloyd's partners covers cargo and counterparty risks

Pricing — 1.10% All-Inclusive

60-70% cheaper than traditional brokers (1.5-3.5%)

Tier	Platform	Escrow	Total	For \$19M deal
Intro (first 10 clients)	0.25%	0.45%	0.70%	\$133,000
Regular	0.50%	0.60%	1.10%	\$209,000
Early Adopter Lifetime	0.35%	0.55%	0.90%	\$171,000

Minimum fee: \$5,000 per deal. Maximum fee: \$750,000 per deal.

Concrete Use Case: 50,000 MT Fuel Oil (UAE → India)

- Seller uploads lot + SGS certificate → AI scores counterparty risk in <10 min
- Buyer books via regulated escrow → \$19M locked, 1.10% all-in fee
- Intermediary (optional): Swiss trading firm coordinates logistics → \$38,000 commission (0.2%)
- Note: Buyers and sellers can also connect directly via GETH AI matching (no intermediary needed)
- Settlement triggered by IoT + quality verification → funds released in <2 hours

- Target GETH revenue per deal: \$209,000 (1.10%)
- Seller receives: \$18,753,000 | Intermediary receives: \$38,000 (if involved)

Strategic Partnerships

- SGS / Bureau Veritas — Quality inspection & certificate verification (API-based validation → NFT minting)
- RAKBANK / Emirates NBD — Regulated escrow services (Bank API ↔ Smart Contract via Chainlink Functions)
- DMCC (Dubai Multi Commodities Centre) — Technology partnership & ecosystem access (50,000+ firms)

Why Dubai, UAE (with contingency)

- VARA — first framework for commodity-backed digital assets in MENA
- DMCC — 50,000+ commodity firms as natural clients (Dubai-based)
- 0% corporate tax until 2031
- ADGM/DIFC — English common law, globally recognised
- Plan B: If VARA reclassifies \$GETH as security → pivot to ADGM FSRA framework

Team

Pavel Bogomolov-Cheliuskin — Founder & CEO (Fuel & Gas Trading)

8+ years executing fuel and gas trades across UAE, Finland, Mozambique, Zimbabwe, and other markets at Harka, Pentium AG, G-Gas, and Grandcliff Petroleum. Deep understanding of industry pain points. Direct network of 5-10 pilot customers ready for test deals post-MVP. Equity: 60-70%.

Vadim Ustinov — Technical Co-Founder & CTO (Software Engineer)

Classically trained engineer with decades of experience building complex systems. Combines rigorous engineering foundations with practical business acumen — understands not just code, but commercial logic behind every product. Committed to quality, reliability, and scalable architecture. Equity: 15-25%.

Option Pool: 10-15% for future hires (senior engineers, legal/compliance)

Use of \$800k Pre-Seed (Legal First Approach)

Category	%	Rationale
Legal Framework (UAE Licensing)	40%	Priority #1: DMCC license + VARA approval + token structuring
Team (Founders + Engineers)	30%	Lean team preparation for post-licensing development
MVP Development (Software + AI)	20%	Begins only after legal foundation is secured
Partnerships + Test Deals	5%	Pilot deal preparation with trusted network
IoT / Hardware Integration	5%	Partner research (no in-house manufacturing)

Financial Forecast (Illustrative — Pre-Revenue)

Phase	Deals	Volume	Revenue	EBITDA	Key Milestone
Q1-Q4 (post-MVP)	4 intro	\$48M	\$336k	-\$464k	VARA approval, test deals
Year 2	21 mixed	\$315M	\$3.1M	+\$1.6M	\$GETH launch, 50+ traders
Year 3	70 mixed	\$1.26B	\$13.5M	+\$9.5M	\$vGETH launch, DAO pilot
Year 3 (with SDI)	70 mixed	\$1.26B	\$20-23M	+\$14-17M	SDI launch, accredited investors

Why Invest at Idea Stage?

- Massive TAM with clear pain and no dominant player
- Previous attempts (Vakt, Komgo) failed — market is ready for open platform
- Founders have direct industry access + engineering depth
- UAE regulatory window open now — timing advantage
- "Legal first" approach reduces regulatory risk

- 1.10% all-inclusive pricing — 60-70% cheaper than traditional brokers
- SDI Phase 2 creates additional \$6-9M revenue uplift in Year 3
- Flexible deal structure: works with or without intermediaries
- Honest about stage: no fake traction, no vaporware
