THE PROBLEM

A \$4.6T Market Still Runs on Fax Machines

1 63% Manual Processes

Excel spreadsheets, email chains and fax machines still dominate commodity trading workflows.

Source: McKinsey Digital Trade Finance Report 2023

3 18+ Month Disputes

Court delays and arbitration bottlenecks kill deals and tie up capital.

Source: ICC Dispute Resolution Statistics

2 Fake Certificates

Fraudulent quality certificates cost buyers over \$50 billion annually.

Source: International Maritime Bureau

4 SMEs Locked Out

Small and medium enterprises have little access to trade finance or verified counterparty networks.

THE SOLUTION

Legal First → Platform → Test Deals

GETH is an idea-stage project building a digital ecosystem for OTC commodity trading — AI-driven counterparty scoring, smart-contract escrow and real-time cargo tracking, on a regulatory foundation secured before a line of production code ships.

1 Priority #1 — Legal

DMCC trade license, VARA conditional approval, token legal structuring, regulated escrow partner, ADGM contingency plan.

2 Priority #2 — Platform

AI counterparty risk scoring, smart-contract escrow, IoT cargo tracking, NFT quality certificates, automated KYB/KYC.

3 Priority #3 — Validation

5–10 pilot deals from the founder's network, iteration on real feedback, unit-economics proof, seed prep.

PRODUCT WALKTHROUGH

How a Trade Moves Through GETH

Illustrative example: 50,000 MT fuel oil, \$19M, Mina-Said (UAE) → Mumbai (India)

1 Lot Creation

Seller uploads spec + SGS certificate; AI verifies credentials.
Target: risk-scored in <10 min

2 AI Matching

Engine matches buyer & seller directly or via intermediary.
Target: no cold calls

3 Escrow Lock

\$19M deposited in regulated escrow; smart contract locks terms.
Target: 1.10% all-in fee

4 Logistics

Vessel booked; IoT sensors activated for real-time tracking.
Target: transparent logistics

5 Cargo Tracking

Temperature, humidity & location streamed via satellite.
Target: tamper-proof data

6 Quality Check

SGS/Bureau Veritas inspection verified against NFT certificate.
Target: no 18-month disputes

7 Settlement

Smart contract triggers payout via bank webhook in hours.
Target: \$209K GETH revenue

8 Reporting

Digital passport with ESG data; full audit trail for compliance.
Target: complete audit trail

MARKET & WHY DUBAI

\$4.6T Market, and a Jurisdiction Built for It

VARA

Clearest regulatory framework for commodity-backed digital assets in the MENA region.

DMCC

50,000+ commodity trading firms as natural early adopters.

0% Tax to 2031

Optimal tax environment for early-stage growth and token treasury management.

Contingency Plan

If VARA reclassifies tokens: pivot to ADGM framework or utility points.

Illustrative Deal Economics

Minimum fee \$5,000 / deal · Maximum fee \$750,000 / deal. Final pricing subject to regulatory approval and market conditions.

PRODUCT ARCHITECTURE

Four Layers, Built After the Legal Foundation

Layer 1 — User Interface	Web dashboard for traders, buyers, sellers, intermediaries. Deal creation, real-time status, document management, communication tools.
Layer 2 — Business Logic	AI counterparty scoring, automated deal matching, smart contract integration, bank API coordination.
Layer 3 — Integrations	Bank escrow APIs, SGS/Bureau Veritas verification, IoT cargo tracking, blockchain (Ethereum L2).
Layer 4 — Data & Security	Encrypted document storage, immutable audit trails, AML/KYC compliance, regulatory reporting.

Current status: architecture design in progress · legal structuring in progress · bank partnerships planned Q2 · platform development planned Q3 · integration testing planned Q4.

LEGAL MOAT

Compliance Is the Product, Not an Afterthought

GETH operates as a technology platform — not a trading house, carrier or insurer. Smart contracts are structured as legally binding instruments under UAE and international law.

BUSINESS MODEL

1.10% All-Inclusive — Below Traditional Broker Rates

	Early Adopter (First 10)	Standard (All-Inclusive)	After Intro (Lifetime)
Platform fee	0.25%	0.50%	0.35%
Escrow fee	0.45%	0.60%	0.55%
Total	0.70%	1.10%	0.90%

Illustrative Deal: 50,000 MT Fuel Oil · \$19,000,000 · Mina-Said (UAE) → Mumbai (India)

Deal value	\$19,000,000
GETH platform fee (1.10%)	\$209,000
Intermediary commission (if involved)	\$38,000
Net to seller	\$18,753,000

Settlement completes in hours via smart contract + bank webhook, not weeks.

TRACTION & NETWORK

Built on Real Industry Expertise, Not Theory

8+ Years Trading

Fuel & gas trades across UAE, Finland, Mozambique, Zimbabwe at Harka, Pentium AG, G-Gas, Grandcliff Petroleum.

Legal Counsel

Engaging a top-tier UAE law firm for VARA/DMCC structuring. Legal-first approach protects investor capital.

Industry Network

Direct relationships with traders, refineries and logistics providers across MENA, Europe, Africa.

Pilot Candidates

5–10 traders from the founder's network expressed interest in testing the platform post-MVP (non-binding).

TEAM

Trading Expertise + Engineering Discipline

Pavel Bogomolov-Cheliuskin — Founder & CEO

8+ years executing fuel and gas trades across UAE, Finland, Mozambique and Zimbabwe at Harka, Pentium AG, G-Gas and Grandcliff Petroleum. Deep understanding of industry pain points and a direct network of traders, refineries and logistics providers across MENA, Europe and Africa.

Vadim Ustinov — Technical Co-Founder & CTO

Classically trained software engineer with decades of experience building complex systems. Combines rigorous engineering foundations with practical business acumen — understands the commercial logic behind every product.

ROADMAP

Legal First → Platform → Test Deals

Q1

DMCC application · VARA conditional approval · token structuring · governance setup

Q2

Legal framework completion · core team assembly · architecture design · bank talks

Q3

MVP development begins · AI scoring prototype · escrow integration · IoT partners

Q4

Beta launch · first 5–10 test deals · seed round prep · tokenomics design

Post-PMF (Phase 2+)

50+ active traders · dual-token economy (\$GETH / \$vGETH, if approved) · Syndicated Deal Investment (SDI) for accredited investors, target 15–25% USD yield · ADGM FSRA licensing · insurance wrapper via Lloyd's · expansion to Saudi Arabia, Qatar, Switzerland, UK, Nigeria, Singapore.

Token issuance and SDI proceed only after product-market fit and necessary licenses. All projections illustrative, not guaranteed.

THE ASK

\$600K – \$1.2M Pre-Seed

At idea stage — legal framework first, then platform, then test deals with the founder's network.

Use of \$800K Pre-Seed Round

What investors receive: equity stake via SAFE or convertible note · early access to token allocation (if applicable) · direct advisory role in strategy · quarterly progress updates · pro-rata rights in the seed round.
